PROFESSIONAL SUMMARY

Full-Stack JS/TS Developer with 4+ years of experience building web and mobile applications across startup, enterprise, and freelance environments. Specialized in React.js, React Native, Node.js, TypeScript, and AWS cloud services. Proven ability to deliver end-to-end products: from UI/UX design systems to backend APIs and mobile apps on iOS and Android. Degree in Computer Science from Universidad Politécnica de Valencia. Bilingual in Spanish (native) and English (professional working proficiency).

WORK EXPERIENCE

Full Stack Developer | DocMorris

September 2025 – Present · Remote

DocMorris is Europe's largest online pharmacy, operating across multiple countries through its mobile app and website.

- AI Health Chatbot (React Native, Next.js, Node.js): Developed an AI-powered chatbot integrated into both the DocMorris website and mobile app. The assistant helps users track their health, answers medical queries, and performs triage across DocMorris services and product catalogue to guide users toward the most relevant solution.
- Promofarma Social Feed (React Native, Node.js): Built a social network feature integrated into the Promofarma app, allowing users to browse health and wellness articles, interact with content, and follow categories of interest — driving engagement within the platform.
- Collaborate in a remote-first, international engineering team, contributing to code reviews, sprint planning, and technical discussions.

Frontend / Full-Stack Developer | Flumotion

May 2024 – September 2025 · Valencia, Spain

Flumotion is Spain's leading company in video, audio, and VOD streaming services.

- Developed production-grade web and mobile applications using React.js, React Native, TypeScript, Node.js, and AWS services.
- Built and maintained features for OTT streaming platforms, including geoblocking, per-user analytics, push notifications, subtitles, and multi-format video/audio support.
- Integrated AWS services including authentication (Cognito/Amplify), databases (DynamoDB), and Lambda functions.
- Collaborated in an agile environment with cross-functional teams across design, backend, and QA.

Full-Stack Developer & Tester | Capgemini

February 2023 – May 2024 · Valencia, Spain

Delivered software for a major French energy company in a large-scale enterprise environment.

- Developed web application features using Angular, .NET, TypeScript, and SCSS.
- Implemented automated test suites with Jest (unit) and Playwright (end-to-end), achieving high test coverage.
- Participated actively in sprint reviews and client-facing product presentations.
- Applied SOLID principles and best practices in a regulated enterprise codebase.

Freelance Full-Stack Developer | Self-employed

January 2022 – Present (alongside full-time roles) · Remote

Delivered desktop, web, and mobile solutions for companies and individual clients across multiple tech stacks.

- Ping – Secure Messaging App (React Native, Expo, Node.js): React Native Developer for a UK-based professional secure messaging and collaboration platform. Implemented key features including end-to-end encrypted chats, WebRTC-based calls, contact and media management. Integrated Signal Protocol, Supabase, and Jitsi, with a focus on performance, scalability, and user experience. (June 2025 – September 2025, Remote)

- Circulantis Dashboard (React, Node.js, Turso, Prisma): CRUD web app for operations management and automated financial calculations.
- Tender Dashboard – Circulantis (Python): Desktop app that scrapes public tenders and auto-generates structured reports.
- Diariamente – Psychologist Mobile App (React Native, Supabase, Figma): Patient mood-tracking app connecting psychologists with patients in real time.
- OTT Platform (React Native, AWS Amplify): Streaming app with geoblocking, analytics, push notifications, subtitles, and live chat.
- Fontanería Rocafull Website & Blog (Astro): Landing page and blog for a local business, optimized for SEO and performance.

TECHNICAL SKILLS

Frontend: React.js, React Native, Next.js, Angular, Astro, TypeScript, JavaScript (ES2022+), HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, .NET
